

Benher Basheer

Full Stack Developer

Wayanad, Kerala, India | +91 9605156601 | benherben456@gmail.com | benherbasheer.me | linkedin.com/in/benher-basheer
| github.com/benherr

Professional Summary

Software Engineer (Fresher) with hands-on experience in full-stack development using Java, JavaScript, React.js, and the MERN stack, plus exposure to emerging technologies like blockchain. Skilled in building responsive, database-driven applications and collaborating within teams. Seeking an entry-level Software Engineer / Full Stack Developer role to apply technical skills and grow within a dynamic organization.

Skills

Programming Languages: Java, Python, JavaScript, HTML, CSS, SQL (MySQL), NoSQL

Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, JDBC, OOP, Web3.js, Solidity

Tools & Platforms: Git, GitHub, Postman, MongoDB, IPFS (Pinata)

Core Competencies: Problem-Solving, Teamwork, Adaptability, Communication, Critical Thinking

Professional Experience

Java Full Stack Development Trainee, QSpiders

Kochi, India

July 2025 – January 2026

- Completed intensive training in Core Java, OOP, Collections, Exception Handling, SQL, and JDBC.
- Developed responsive web applications using HTML, CSS, and JavaScript, and built mini-projects integrating Java with relational databases.
- Applied MVC architecture principles to structure backend and frontend integration.

Projects

Decentralized Voting Application (DApp)

github.com/benherr/D-voting-app

- Developed a decentralized web application for secure, transparent online elections using blockchain technology, with Solidity smart contracts for voter registration, candidate management, vote casting, and results.
- Integrated IPFS via Pinata for decentralized storage of voter/candidate metadata; built a responsive Next.js frontend with wallet-based authentication.
- Ensured data immutability and prevented double voting through blockchain-based validation logic.

Tech Stack: Solidity, Ethereum, Next.js, JavaScript, IPFS (Pinata), Web3.js

CampusCare – Complaint Management System

github.com/benherr/campuscare

- Designed and developed a full-stack MERN application to register, track, and manage infrastructure complaints at a college, with role-based authentication for students and administrators.
- Enabled students to submit complaints with category, description, and real-time status tracking; built an admin panel for viewing, updating, and resolving complaints.
- Reduced manual complaint-handling effort and improved response time through workflow automation.

Tech Stack: MongoDB, Express.js, React.js, Node.js, HTML, CSS, JavaScript

Education

Master of Computer Applications – College of Engineering, Vadakara, Calicut

2023 – 2025

CGPA: 7.31 / 10

Bachelor of Computer Applications – Nilgiri College of Arts and Science, Tamil Nadu

2019 – 2022

CGPA: 7.31 / 10

Certifications

- Introduction to DevOps – IBM
- Turning Data into Decisions Using Python – IBM SkillsBuild Winter Certification Program
- Introduction to Internet of Things – NPTEL
- Linux Fundamentals – LearnQuest
